SUMMARY

Student developer with hands-on backend/automation: Python/FastAPI, Telegram, TypeScript/React, Docker. Built deterministic catalog pipelines (170 cars / 4,844 images), hybrid RAG demo (Qdrant, 12 tests), local document search (SQLite FTS + OCR). Focus: reliable APIs, reproducible pipelines, evidence over slogans. Deepening RAG/eval.

PROJECTS

DOCUMENTANALYZER · DESKTOP
Local search across PDF/DOCX/HTML/TXT/RAR
Python / PySides / SQLite FTS / Tesseract / Poppler
Incremental indexing + offline full-text search with OCR fallback. Multi-threaded batch, PyInstaller build. Result: instant local search without cloud.

RAG DEMO · FASTAPI / QDRANT / DOCKER
Hybrid retrieval with citations and eval
FastAPI / Qdrant / Hybrid (lexical + semantic) / Docker
Chunking, lexical/semantic/hybrid search, citations, eval suite. Reproducible compose run. Result: 12 tests, verifiable answers — github.com/illmxnn/rag-demo
github.com/illmxnn/rag-demo

INGUL · STATIC CATALOG · GITHUB PAGES
Packaging catalog with responsive galleries
HTML / CSS / JS / Github Pages
Responsive strips, lightbox, mobile-first. Result: galleries 12 / 14 / 18 photos, static deploy — demo on request.

JUSTCARS EXPORTER · PYTHON / TELEGRAM / FASTAPI
Deterministic XLSX/XML export — 170 cars / 4,844 images
Python 3.11 / python-telegram-bot / FastAPI / MySQL / Docker
Export-only, exact 24/24 header validation, numeric normalization, deterministic images, validator for importer. Result: 170 / 4,844 in one run, no manual diff. Anonymized.

ON REQUEST · NDA-SAFE

AgendHub (AI agent control plane, OpenCode fork: gateway/tenancy/budgets/Postgres) · MorCars CRM (bookings/tariffs/OCR) — details/screencast on request for vacancy.

EDUCATION

State University of Information and Communication Technologies (DUCT) — 3rd year
